RELEVANT EXPERIENCE

UNIVERSITY OF ALBERTA | Simulation Designer | Work

June 2019 – Present

- Published 3 comprehensive documentation manuals on how to use Javascript's JSXGraph, Glowsript's Visual Python, and Python's Bokeh libraries after extensive research (<https://engcourses-uofa.ca/interactive-elements-manual/>)
- Converted old Mechanical and Civil engineering interactive educational examples to Javascript and Python, with an improvement to latency from seconds to milliseconds
- Web administrator for Faculty of Engineering course's WordPress website (<https://engcourses-uofa.ca/>)
- Filmed and edited 110 engineering lab videos for 11 different courses in preparation for online course delivery with a group of 4 in 2 months

WEB DEVELOPER | Project | <https://w3ichen.github.io> | <https://tkd.pythonanywhere.com> Nov. 2019

- Designed and programmed personal website entirely from scratch to host creative works in art, Autodesk Maya, Solidworks 3D design, photography, and videography. As well as, coding projects that are comprised mainly of web APIs, Flask and Django, and Machine Learning projects that I learned online
- Designed and programmed taekwondo club's website on Django framework with fully functional Admin GUI to modify content; actively used by club to organize announcements, events, forms, and photos

FUTURE CREATORS | Project Lead | Club

Dec. 2019 – Present

- Developed a project kit on Machine Learning in Unity and a Django social media site with posting, commenting, and liking functionalities as a Project Lead
- A student group that teaches grades 7 to 12 students the basics of coding, Arduino, and 3D modeling

HACKATHONS

- HackED Beta 2019 - Programmed a variation of Advanced Encryption System in a 24-hour hackathon with a team of 5
- HackED 2020 - Web scraped and analyzed public medical data to determine if the patient will die from cancer

PUBLICATIONS

Engcourses Manuals

Aug. 2020

- Published 3 comprehensive documentation manuals to Faculty of Engineering's courses website for use by Professors and Students to program interactive educational examples. The 3 libraries covered in detail are Javascript's JSXGraph, Glowsript's Visual Python, and Python's Bokeh. Where JSXGraph is used for 2D examples, VPython for 3D examples, and Bokeh deployed on Heroku for examples requiring Python libraries. (<https://engcourses-uofa.ca/interactive-elements-manual/>)
